Eversource	Residential Variable Rate - Airline Rewards	Electric	kWh	\$0.1699	\$0.0000

*Effective date: **10/1/2026**

Disclosure: Month-to-Month Basis. If during a Renewal Period, you receive electric service from Direct Energy on a month-to-month basis as set forth in the Notification, the rate for electricity will be a variable rate that may be higher or lower each month and will be set in Direct Energy's sole discretion. Direct Energy typically considers the following factors when setting variable rates: - publicly available competitor pricing; - strategic business objectives; - customer retention or attrition; - market volatility or uncertainty; - anticipated customer usage; - the cost of procuring power including wholesale prices, ancillary service costs, capacity auctions, utility fees, transmission and distribution losses and storage costs; - weather, supply congestion and infrastructure issues; - legal or regulatory issues; and - profit margin. This list of factors is not exhaustive and no single factor will determine the rate. Some factors must be estimated or projected and the factors Direct Energy considers may be weighed differently each month. Direct Energy does not include other costs, including but not limited to, the price of transmission and distribution, the system benefits charge, stranded cost recovery charge, and taxes. Direct Energy may amortize sudden cost increases over multiple billing cycles so that its customers do not bear the burden of such increases in a single month. In addition, Direct Energy seeks to acquire the majority of its anticipated electricity supply in advance rather than from the spot market. For all of these reasons, the variable rate may not correlate with changes in wholesale market prices or your local utility's rates. In addition, the variable rate may be higher than your local utility rate or other suppliers' rates. To obtain your next month's variable price please visit our website at <https://www.directenergy.com/future-pricing/new-hampshire-future-variable-pricing>. There is no price cap or price floor for variable rates. You will not know the variable price until the first bill after renewal is issued. It may take one or more billing cycles for a price variation to become effective. To view the maximum and minimum variable rate charged in the last 12 months visit <http://www.directenergy.com/historical-pricing> or call 1-866-334-8084.
